News from Dibble Optical

Representing Nidek in the South East

Nidek has recently appointed Dibble Optical as its first co-management partner with exclusive responsibility for sales of Nidek products in the South East of England.

This unprecedented appointment means that the entire range of Nidek edging machinery and Nidek, Oculus and Frastema ophthalmic instruments is now available from Dibble Optical.

Nidek Consumables

It's a little known fact that Dibble Optical supply one of the largest range of quality Nidek edging consumable products from any other UK supplier. B&S have had a long-standing relationship with Nidek for many years, and their expertise with their consumable products is second to none.

As the largest supplier of its kind in Europe, B&S uses its expertise to provide top quality consumable products at surprisingly low prices. Take the Nidek de-blocking pliers for example - priced more than 40% less than a competitive product with the extra advantage of our exclusive ten year guarantee!

Going Green with the LFU-220

Care about people and the environment?

The new Nidek LFU-220 lens dust filtration unit provides the solution with the added advantage of using a fraction of the water supply of direct supply or a pumped system.

An ideal answer to lens edger waste in areas where disposal of lens edger waste via waste water is forbidden by the local authority.

New Year—New Lensmeter?

The new Nidek LM-500 auto lensmeter provides simple and fast measurement using leading edge Nidek technology.

Featuring quick detection and smooth measurement flow, including with progressive lenses.

Special Offer £1,295
